DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Claims 10-17 in Paper No. 7 is acknowledged.

Claims 1-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

Claim Objections

Claims 10-17 are objected to because of the following informalities: the Applicant refers to AlGaIP in the specification and claims; however the claimed material should be AlGaInP. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 10 and 12-17, it is unclear what the structural relationships are between the first and second semiconductor regions. Examiner suggests adding the limitations of Claim 11 to independent Claim 10

Art Unit: 2828

Regarding Claims 10-14, it is unclear what an "etching control layer" comprises other than a "composition different from that of the substrate."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Treat et al. (US 5412678).

Regarding Claim 10, Treat et al. discloses a semiconductor laser device including:

an etching control layer (d; col. 5, line 58- col. 6, line 53, labeled cladding layer comprising AlGaInP and functioning as an Etching Control layer), which is formed on a first region of a compound semiconductor substrate and has a composition different from that of the substrate (b; col. 5, line 58- col. 6, line 53);

a first semiconductor laser structure (43; Fig. 4a), which is defined over the etching control layer (Fig. 4a) and which is made up of multiple semiconductor layers including a first active layer with a composition different from that of the etching control layer; and

Art Unit: 2828

a second semiconductor laser structure (44; Fig. 4a), which is defined on a second region of the substrate and which is made up of multiple semiconductor layers including a second active layer.

Regarding Claim 11, Treat et al. discloses a channel (u) that separates etching control layers.

Regarding Claims 12-13 and 15-16, Treat et al. discloses a layer comprising AlGaNP as claimed. (col. 5, line 58- col. 6, line 53).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Paoli (US 5963568), Sun (US 5999553) and Sun et al. (US 6167074).
